### Profile

I am a frontend developer with experience in HTML, CSS, JavaScript, React, jQuery and Bootstrap. I have a strong command of web development best practices and a strong ability to create intuitive and responsive user interfaces. Additionally, I am bilingual in English and Spanish, which allows me to communicate effectively in international teams.

Committed to delivering high-quality web solutions, I thrive on challenges and continuously seek opportunities for growth and learning.

### Experience

#### Freelance Web Developer

July 2023 / March 2024 - Present

As a freelance web developer, I have undertaken several projects showcasing my skills in JavaScript, HTML, CSS and React. Here are some notable experiences:

#### Personal Portfolio Website (JavaScript, HTML, CSS):

- Designed and developed a professional portfolio website using HTML, CSS, and JavaScript to showcase my skills, projects, and experiences.
- Leveraged JavaScript for interactive elements, such as moving the pages of the portfolio to navigate it and give the sensation that it is a book, improving the user experience.
- Created custom animations and transitions using CSS to add visual appeal and engage visitors, reflecting my creativity and attention to detail.

#### Responsive Website Development (HTML, CSS, JavaScript):

- Create responsive web pages using HTML, CSS and JavaScript.
- Implemented modern CSS techniques, including flexbox and grid layouts, to create visually appealing and responsive web designs.

My experiences have honed my problem-solving skills, and my attention to detail and ability to adapt to evolving technologies and project requirements makes me a valuable asset to any development team.

### Education

Currently studying Higher Technician in Programming at UTN University. Eager to apply theoretical knowledge and gain practical experience in a professional environment.
